Subject: Doyle Security Proposal – Access Control System

Good Afternoon Sir,

I have put together our proposal for upgrading and expanding the current Access Control Systems in the Police and Fire Department Areas.

- **The owners will be responsible for providing an active network jack and 110VAC power to all Access Control Panels.**
- **IT Support will be required to put the system on the owner's network to allow for the new Alarm.com Access System to work. This is a must.**

The Alarm.com Access System has a monthly cost associated with it for the Alarm.com Account that can be accessed through any PC with an internet connection or any smart device.

- Alarm.com Access Control Video Link: [Alarm.com Access Control](#)

Please let me know if you have any questions or if I can help in any other way.

Regards,

Kevin Ryan
General Manager - Albany
Doyle Security Systems

Scope of Work: Alarm.com Access Control Upgrade

- **The owners will be responsible for providing an active network jack and 110VAC power to all Access Control Panels.**
- **IT Support will be required to put the system on the owner's network to allow for the new Alarm.com Access System to work. This is a must.**
- Doyle to replace (2) TruPortal Access Control Panels with Alarm.com 4-Door Access Control Panel with a built-in Power Supplies in the Police and Fire Department.
 - Customer to provide a network connection to allow the new System to be accessed on Smart Devices or any internet portal. This is a requirement.
 - 2-Door Expansion Modules will be used with both Main Panels to allow for additional Doors of Access.
- Doyle will install Electric Strikes and HID Proximity Readers at all the new Access Controlled
- Doyle will reuse the existing Magnetic Locks and Electric Strikes on all ten existing Doors of Access.
- Doyle will provide (50) HID Fobs that will work with the new Alarm.com Access Control System.
- HID Proximity Readers will be installed at each Access Controlled Door to allow for Key Fob Access.
- All devices will be tested during the installation.
- Doyle will setup and train you on the use of the new Alarm.com Account, Portal, and Smart Application.
